

KickStart GHANA

Progress Through Sport and Education

Project feedback

Name: Emmanuel

Organisation: Regional Model School, Ho

Position within organisation: Headmaster

1. What does your organisation do? What is its mission?

Our hope is to become the model school of the region. This is in academic, sporting, curricular and extracurricular terms. We aim for our students to be sufficiently well educated so that can go on to Senior Secondary School and university. At the end of this we hope that they are well placed within society.

2. How have you involved KickStart Ghana volunteers in your activities?

Volunteers have helped teach English and other subjects. They have also provided the man power to renovate the school. They also swapped ideas with the staff about teaching which has been hugely beneficial.

3. What difference have the KickStart Ghana volunteers made to your organisation? What impact have they had?

The volunteers have lifted the environment of the school, it is now much more conducive for learning. Ever since the school was opened 28 years ago it has not been renovated. KickStart Ghana have now broken this chain.

The renovation work will have a lasting impact on the students, parents and even the schools around. The pupils performance will increase with this conducive learning environment.

I am so happy and so are my staff.
